Response to Arguments

1. Applicant's arguments, see Request for Continued Examination, filed November 7, 2005, with respect to claims 1-30 have been fully considered and are persuasive. The rejections of the claims have been withdrawn.

Allowable Subject Matter

2. Claims 1-30 are allowed. The following is an examiner's statement of reasons for allowance:
 - a. Regarding independent **claim 1**, and all of its dependent claims, the prior art of record fails to sufficiently describe or suggest a system supporting access, monitoring, and control of appliances wherein a local area network couples a set top box to at least one home appliance to allow access, monitoring, and control of the at least one appliance. The set top box acts as a gateway for passing commands (non-stored) from a remote second location to the at least one home appliance.
 - b. As for independent **claim 15**, and all claims depending therefrom, the prior art of record neither describes nor sufficiently suggests a method of providing access, monitoring, and control of appliances via a communication network; the method comprising the steps of identifying by a first system (media processing system) at a first location at least one home appliance communicatively coupled to a second system (media processing system) at a remote second location. A step of verifying authorization for control of the at least one home appliance at

the remote second location takes place at the first system and a command is communicated from the first system to the appliance at the remote second location if the verifying is successful. The first system receives at least one response from the at least one home appliance if a command is communicated. The commands are sent from the first location to the home appliance at the remote second location via a wide area network.

These along with further limitations set forth by the claims render the application allowable over the prior art of record. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M. Blount whose telephone number is (571) 272-2973. The examiner can normally be reached on 8:00 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Hofsass can be reached on (571) 272-2981. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
